### AI-POWERED VEHICLE CAMERA AND SAFETY SYSTEM

**VT3000-AI** combines a next generation 4G vehicle camera with the power of artificial intelligence (AI). The advanced video telematics solution has been specially developed for commercial vehicle operations to help reduce fleet risk and prevent incidents before they happen. This means transport businesses can effectively improve safety by reducing the frequency and severity of collisions.

## VT3000-AI

Using the latest AI technologies – including **Advanced Driver Assist System (ADAS)** and **Driver Status Monitoring (DSM)** – the **VT3000-AI** detects both hazards on the road and high-risk driver behaviours. The **ADAS** camera identifies lane departure, forward collisions and tailgating, while the **in-vehicle monitor** can recognise if a driver is tired or distracted by actions such as mobile phone use, smoking and eating. This means a driver can immediately be alerted to potential dangers, while an office-based fleet manager can monitor areas of concern both in real-time and historically.

The **VT3000-AI** can capture an additional view with an optional **digital (IP) internal or external camera** – cab, side, rear or cargo facing – for increased visibility and peace of mind. It also includes up to 512GB of internal storage capacity; optional panic alarm; and livestream and seamless playback functionality.

### Key features:

Industry-leading, connected and HD-quality vehicle camera and telematics system

Provides First Notification of Loss (FNOL) alerts

Provides HD images before, during and after an incident

Accurate 100Hz G-shock sensor measures impact force and driving style

Monitor driver behaviour from anywhere using the VisionTrack IoT platform

Built-in GPS and GLONASS receiver with self-checking notifications

## VT3000-AI

### Specifications:

<b>Network</b>	3G/4G	Supported
<b>Positioning</b>	GPS	Supported
<b>Sensor</b>	Six-axis sensor	Supported
<b>Working status indicator</b>	The indicator light shows the four states of the device:	<b>Power on:</b> the device is powered, the red light is always on <b>Normal operation:</b> green light is always on <b>Fault alarm:</b> indicator red light flashes once a second <b>Sleep:</b> green light flashes 1 second and off 10 seconds
<b>Storage</b>	SD Card	2x SD card, supports SDXC64GB/128GB/256GB
<b>Video &amp; Audio</b>	Video and Audio recording	3 channels for video and 1 channel for audio
	Resolution ratio and frame	VT3000-AI: 1080P@30fps
	Rate of main code stream	VT-DSM-AI: 960P@30fps
	Total resource	1080P@30fps+960P@30fps+720P@30fps, 3-channel CIF@15fps
	Image setting	Brightness, colour, contrast, colour saturation
	Video coding	H.264
	Video compression rate	VT3000-AI: 500Kbps ~ 6Mbps
	Audio compression standard	ADPCM/G.711
	CBR/VBR	Supported
	Audio input	Optional (off by default)
<b>Camera parameters</b>	Sensor type (VT3000-AI)	1/2.9" 2M pixel CMOS Sensor
	Shutter speed	1/30sec - 1/1000000sec
	Lens/FOV (field of view)	VT670-IPC: 1.98mm/150° (FOV); VT3000: 4mm/90° (FOV)
	Lens interface type	M12
	Wide dynamic range	D-WDR
	Backlight compensation	Supported
	Signal to noise ratio S/N	>48db
<b>Interface</b>	RS232	1 channel
	RS485	1 channel
	IO alarm input	4 channels
	IO alarm output	1 channel
	Power output	5VDC@500mA, 12VDC@500mA
<b>Protocol</b>	Network Protocol	HTTP, TCP, ARP, UDP, FTP, DHCP, DNS, IPV4, NTP
<b>Power related</b>	Power supply	9-36V
	Typical power consumption	6W (up to 12W with 12v power output option from GPIO cable)
<b>General specification</b>	Operating temperature	-30°C~+70°C
	Storage temperature	-40°C~+85°C
	Humidity	0% - 90%
<b>Dimensions</b>	LxHxW	90x39.5x100mm
